

Laser Dust Sensor

(Model: T Z J08)

Manual

Version: 1.0

Issue Date: 2018-07-04

Taiyuan Tengxing sensor technology Co., Ltd

Statement

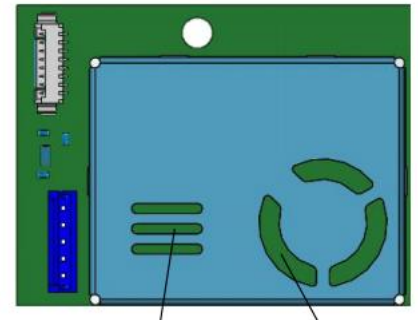

1. The copyright of instructions belong to Taiyuan Tengxing sensor technology Co., Ltd(hereinafter referred to as the Company), nobody is allowed to copy, translate, spread or store without written approval.
2. Thanks for using our product. In order to use the products more smoothly, reduce faults result from inappropriate using, please read the instructions carefully before using and follow the rules suggested strictly. Anyone who don ' t follow the instructions, disassemble or change the internal components without permission will afford the loss.
3. The color, style and size of the product is subject to the object you received.
4. The company follows the idea of scientific and technological progress , make efforts to product-improving and technology-innovating. So we have the right to improve product without prior notice.
5. Please make sure it ' s valid before using the instructions. Any good suggestions from you is welcomed.
6. The instructions should be well kept.

TZJ08 Laser dust sensor

Description:

Laser Dust sensor module is a common type, small size sensor, using laser scattering principle to detect the dust particles in air, with good consistency and stability. It is easy to use, with UART & PWM output; Small size is suitable for integrating.

Dust Collecting Hole
(Inlet)

Outlet

Features:

Good consistency
Real time response
Accurate data
Low power consumption
Minus resolution of particle diameter
is 0.3 μm

Main Applications:

Air purifiers
Ventilation systems
Portable instrument
Air quality monitoring equipment
Air conditioner
Smart home fields

Technical parameters:

Model	TZJ08
Types of Detection	PM1.0, PM2.5, PM10
Preheating Time	30
Output	UART_TTL Output (3.3V level)
	PWM Output (3.3V level)
Working Voltage	4.9V ~ 5.5V(DC)
Working Current	< 120mA
Dormancy Current	< 20mA
Response Time	T90 < 45s
Working Humidity	0 ~ 80%RH(No Condensation)
Working Tem	- 10 ~ 50°C
Storage Tem	- 30 ~ 70°C
Dimension	58.5×44.5×14.8mm(L×W×H)

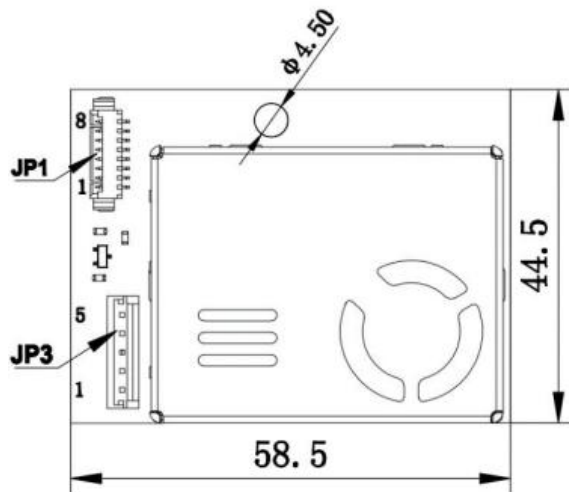

Fig1.

JP1 Line Sequence Definition			JP3 Line Sequence Definition		
Specification: MOLEX-1.25*8			Specification: JST-EH2.54		
Pin	Definition	Parameters	Pin	Definition	Parameters
1	VDD	4.9-5.5V	1	GND	
2	GND		2	TXD	TTL@3.3V
3	Reserve		3	VDD	4.9-5.5V
4	RXD	TTL@3.3V	4	PWM(L)*	5V(Low-level effective)
5	TXD	TTL@3.3V	5	RXD	TTL@3.3V
6	Reserve	NC			
7	NC				
8	PWM(H)*	3.3V(High-level effective)			

Table 2.

Sensor Construction:

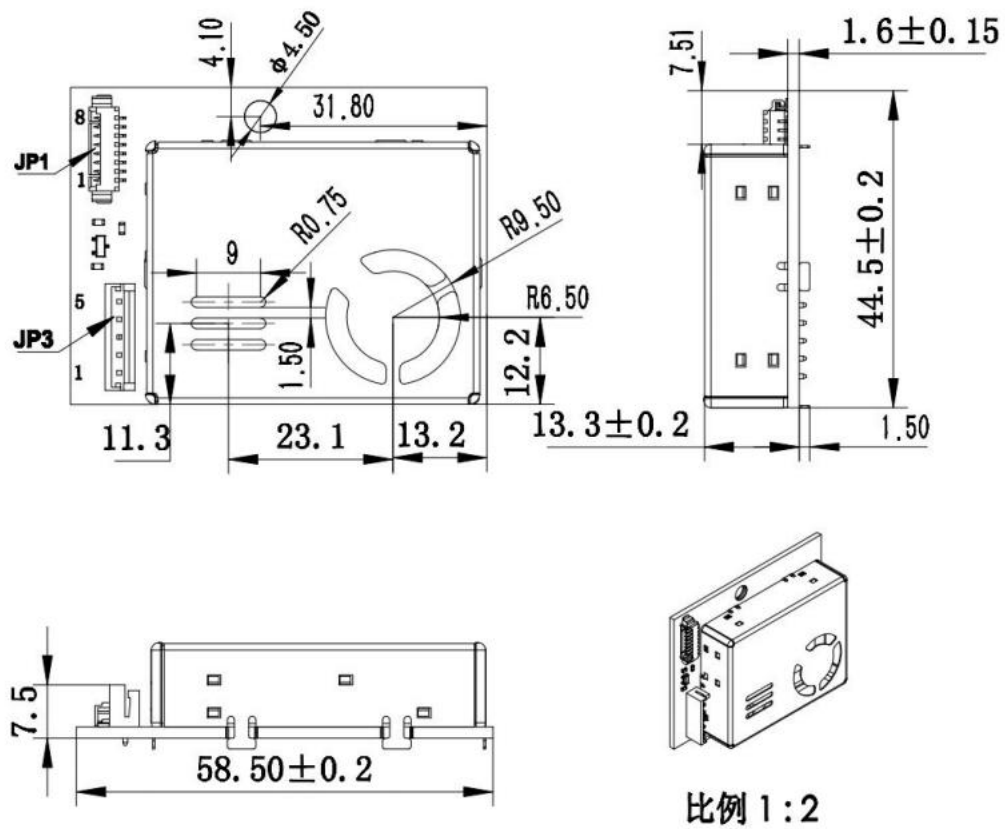

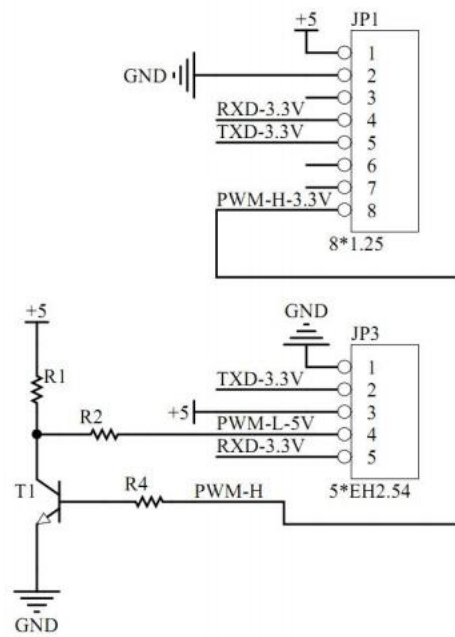

Fig2. Sizes (Tolerance: ±0.5mm)

Installation Method:

The Sensor air inlets and outlets need to keep in good contact with external air. When the sensor is installed and working, must avoid strong airflow interference around the sensor; if it cannot be avoided, try to keep the external airflow direction perpendicular to the the inlet or outlet.

JP1 and JP3 PWM signal level conversion circuit

Attentions:

1. Prohibit changes and displacement electronic components installation status;
2. Modules cannot withstand excessive impact or vibration;
3. Avoid the air flow inside the sensor being affected by the external air flow;
4. Avoid sticky particles from entering the sensor and prevent moisture from affecting performance ;
5. The location of the fan is the air outlet, and the dust collection hole is the air inlet, please ensure that the air inlet and air outlet are unobstructed to the outside world;
6. The supporting terminal pins and pads and sensors stainless steel shielding masks avoid short circuits.
